SPOT THE FOUR MISTAKES

This sheet looks fine. It isn't.

LANE	SIZE	RATE	VALID TO
Ningbo → MEL	20GP	USD 1,450	31 Mar (1)
Ningbo → MEL	40GP	USD 2,300	31 Mar (1)
Shanghai → SYD	40GP (2)	USD 2,150	– (3)
Delivery metro	any	AUD 450	
Origin charges		incl.? (4)	

1. Expired in March, still on the sheet
2. No 40HC rate on the lane
3. No validity date at all
4. Origin charges: included… or not?

> Every one of these turns a 2-minute quote into a 20-minute hunt, or a quote that loses money.

PART 1 · VALIDITY

Is this rate still real?

- [ ] **Every rate has a "valid to" date**

  No date means every quote starts with a check.

- [ ] **Expired rates are removed or marked**

  One expired line quoted in a busy week costs more than clearing them all out.

- [ ] **Future rates carry a "valid from"**

  A GRI starting on the 15th is quoted from the 15th, not the day the notice landed.

PART 2 · COVERAGE

Can you price what they actually ask for?

- [ ] **20GP, 40GP and 40HC on every FCL lane**
  Or the 40HC request gets priced off the 40GP line. Everyone's done it once.

- [ ] **LCL has a W/M rate and a minimum**
  Without the minimum, small shipments go out below cost.

- [ ] **Air has weight breaks and a minimum**
  Min, −45, +45, +100, +300, +500, +1000 kg, plus your divisor.

- [ ] **Your top 20 lanes are covered**
  Check last quarter's requests, not the lanes you wish they asked for.

PART 3 · CHARGES

Where the margin quietly leaks.

- [ ] **Origin and destination charges, one line each**

  THC, docs, ISPS: listed, not buried in the freight.

- [ ] **Clearance and biosecurity priced separately**

  The most common line missing from a "complete" quote.

- [ ] **Delivery by zone or postcode**

  A flat metro rate undercharges the far suburbs and overcharges the near ones.

- [ ] **Surcharges named, not merged**

  BAF, PSS and peak move on their own schedule.

PART 4 · QUOTING RULES

Same request, same price. Every time.

- [ ] **Every rate states its currency**
  USD freight + local charges, no silent conversions.

- [ ] **Markup is written down**
  Per mode or per customer, so two people quote the same number.

- [ ] **Exclusions are standard wording**
  Duty, taxes, storage, detention: the same line on every quote.

- [ ] **One person owns the sheet**
  Carrier notices go to one place and get merged the same day.

WHY IT MATTERS

The shipper sent the same request to five forwarders.

The first complete, believable price usually wins. A clean sheet is what makes a fast quote possible.

Slow quotes don't lose on price. They lose on time.

SKIP THE MANUAL CHECK

Email us the sheet. Get the problems back in minutes.
